Bump Add and Subtract

Description
In this activity students are encouraged to add and subtract using the bump method. This activity is adaptive.

Teaching Hints
Use the visualisation to demonstrate the steps involved. This is an advanced strategy. Students should master the compensation strategy before using this one. Discuss when this method would be the most useful.

Activities

Example 1
Use the bump to 10 strategy:

76 - 62 = 

Example 2
Use the bump to 10 strategy:

257 + 186 =
