Section 1 – Answers (pp. 1–14)

• telling time__________________________ 1
• measuring time__________________________ 7

Section 2 – Assessment with answers (pp. 15–20)

• telling time__________________________ 15
• measuring time__________________________ 17

Section 3 – Outcomes (pp. 21–22)
Telling time – five minute intervals past the hour

It takes 5 minutes for the minute hand to move from one number to the next. The time shown on this clock is 20 minutes past 6.

Remember – the minute hand is the longer one.

1 Write the number of minutes it takes the minute hand to move from the following:

   - a 8 to 12 20
   - b 5 to 7 10
   - c 2 to 4 10
   - d 11 to 3 20
   - e 6 to 1 35
   - f 5 to 10 25

2 Connect each time to the matching clock face:

   - 25 minutes past 9
   - 10 minutes past 2
   - 20 minutes past 12
   - 5 minutes past 6

3 Draw the hour and minute hands on each clock to show the correct time:

   - a 5 minutes past 6
   - b 20 minutes past 3
   - c 10 minutes past 9
Telling time – five minute intervals to the hour

When the minute hand has passed 30 instead of saying the number of minutes after the hour, you can say the number of minutes before the next hour.

1. Label the clocks:

   a
   10 minutes to 9

   b
   20 minutes to 8

   c
   5 minutes to 5

   d
   25 minutes to 10

2. Connect each clock to its time label with a line.

   - 15 past 4
   - 20 to 3
   - 10 to 4
   - 5 past 7
   - 15 to 9
   - 15 past 6
Telling time – digital

Digital time is always read as minutes past the hour. This digital time could be read as 24 minutes past 8 or eight twenty four.

1 Write the times that these digital clocks are showing:

<table>
<thead>
<tr>
<th>Digital time</th>
<th>How we say it</th>
<th>What it means</th>
</tr>
</thead>
<tbody>
<tr>
<td>a 03:49</td>
<td>six oh nine</td>
<td>9 minutes past 6</td>
</tr>
<tr>
<td>b 05:08</td>
<td>three forty two</td>
<td>42 minutes past 3</td>
</tr>
<tr>
<td>c 02:48</td>
<td>four twenty five</td>
<td>25 minutes past 4</td>
</tr>
<tr>
<td>d 04:36</td>
<td>seven forty eight</td>
<td>48 minutes past 7</td>
</tr>
</tbody>
</table>

2 Draw the times on the clock faces and show the digital time below:

<table>
<thead>
<tr>
<th>Time</th>
<th>Clock Face</th>
</tr>
</thead>
<tbody>
<tr>
<td>03:49</td>
<td><img src="image1" alt="Clock Face" /></td>
</tr>
<tr>
<td>05:08</td>
<td><img src="image2" alt="Clock Face" /></td>
</tr>
<tr>
<td>02:48</td>
<td><img src="image3" alt="Clock Face" /></td>
</tr>
<tr>
<td>04:36</td>
<td><img src="image4" alt="Clock Face" /></td>
</tr>
</tbody>
</table>

3 Complete the table to match how we say digital time to what it means:

<table>
<thead>
<tr>
<th>Time</th>
<th>Clock Face</th>
</tr>
</thead>
<tbody>
<tr>
<td>08:50</td>
<td><img src="image5" alt="Clock Face" /></td>
</tr>
</tbody>
</table>

The time is eight fifty.
In digital time, when it is later than half past the hour, we can tell how long it is until the next o’clock. This time says 7:40 which means after another 20 minutes it will be 8:00. This makes sense because there are 60 minutes in an hour. 

40 + 20 = 60

7:40 + 20 minutes = 8:00

**4 How many minutes until the next o’clock?**

- **a** 6:50 + 10 minutes = 7:00
- **b** 2:40 + 20 minutes = 3:00
- **c** 1:35 + 25 minutes = 2:00
- **d** 9:45 + 15 minutes = 10:00
- **e** 4:55 + 5 minutes = 5:00
- **f** 10:50 + 10 minutes = 11:00

**5 Write the times shown on the clocks in digital form then calculate how many minutes until the next hour. The first one has been done for you.**

- **a** 03:42
  - 18 minutes to 4
- **b** 06:46
  - 14 minutes to 7
- **c** 12:37
  - 23 minutes to 1
- **d** 04:36
  - 24 minutes to 5

**6 Read how many minutes there are until the next hour. Show this time on the clock face and in digital form.**

- **a** 02:44
  - 16 minutes to 3
- **b** 07:40
  - 20 minutes to 7
- **c** 09:35
  - 25 minutes to 10
- **d** 07:43
  - 17 minutes to 8
This is a game for 2 players. You will need only 1 copy of this page. Cut out the set of cards below.

Shuffle the cards well, then lay them out face down in a random spread.

Take turns to turn over two cards at a time to find a matching pair. A pair matches if they both have the same time on them. Keep playing until all the cards are gone. The player with the most pairs wins.

<table>
<thead>
<tr>
<th>What to do next</th>
<th>Add to this set of cards by writing your own matching time statements.</th>
</tr>
</thead>
<tbody>
<tr>
<td>18 minutes to 4</td>
<td>03:42</td>
</tr>
<tr>
<td>30 minutes later than 1:15</td>
<td>01:45</td>
</tr>
<tr>
<td>01:35</td>
<td>17:50</td>
</tr>
<tr>
<td>02:27</td>
<td>3 minutes until two thirty</td>
</tr>
<tr>
<td>Half past 9</td>
<td>09:30</td>
</tr>
<tr>
<td>12:30</td>
<td>45 minutes earlier than 1:15</td>
</tr>
</tbody>
</table>
Holly has a wrist watch that only has an hour hand. The minute hand has fallen off. Although it is broken, Holly can still tell the time.

Figure out the time of each of Holly’s activities. Draw in the minute hand.

a  Holly gets up for school at __________.

b  She starts class at __________. or 9:30

c  Her recess is at __________.

d  Lunch is at __________.

e  After school swimming training is at __________.

f  Bedtime is at __________. or 9:30
Measuring time – am and pm

am means before midday.
pm means after midday.

Write am or pm in each sentence:

a. Jamie walks his dog every morning at 6:30 am before breakfast.

b. Natalie has a snack after school at 4:00 pm.

c. Just after midnight at 2:15 am, we heard a noise outside.

Complete this table by writing the times in digital form. Circle am or pm in the last column:

<table>
<thead>
<tr>
<th></th>
<th>Time Description</th>
<th>Digital Time</th>
<th>Am/Pm</th>
</tr>
</thead>
<tbody>
<tr>
<td>a</td>
<td>Ten past three in the morning</td>
<td>3:10</td>
<td>am</td>
</tr>
<tr>
<td>b</td>
<td>Quarter to nine at night</td>
<td>8:45</td>
<td>am</td>
</tr>
<tr>
<td>c</td>
<td>Twenty to two after midnight</td>
<td>1:40</td>
<td>am</td>
</tr>
<tr>
<td>d</td>
<td>Daytime, eighteen minutes past one</td>
<td>1:18</td>
<td>pm</td>
</tr>
<tr>
<td>e</td>
<td>Seven minutes to twelve at night</td>
<td>11:53</td>
<td>am</td>
</tr>
</tbody>
</table>

Add two hours to each of these digital times:

a. 9:52 am  11:52 am
b. 3:15 pm  5:15 pm
c. 11:30 am  1:30 pm
d. 1:42 pm  3:42 pm
e. 11:15 am  1:15 pm
f. 10:48 pm 12:48 am

How many hours from:

a. 4:00 pm to 7:00 pm  ___3___ hours
b. 5:00 pm to 11:00 pm  ___6___ hours
c. 9:00 am to 1:00 pm  ___4___ hours
d. 8:30 am to 6:30 pm  ___10___ hours
Measuring time – time facts

It is important to learn these time facts:

<table>
<thead>
<tr>
<th>Time Unit</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>60 seconds</td>
<td>1 minute</td>
</tr>
<tr>
<td>60 minutes</td>
<td>1 hour</td>
</tr>
<tr>
<td>24 hours</td>
<td>1 day</td>
</tr>
<tr>
<td>7 days</td>
<td>1 week</td>
</tr>
<tr>
<td>14 days</td>
<td>1 fortnight</td>
</tr>
<tr>
<td>52 weeks</td>
<td>1 year</td>
</tr>
<tr>
<td>12 months</td>
<td>1 year</td>
</tr>
<tr>
<td>365 days</td>
<td>1 year</td>
</tr>
<tr>
<td>366 days</td>
<td>1 leap year</td>
</tr>
</tbody>
</table>

1. How many days are there in:
   a. 2 weeks = __14__ days       
   b. 1 leap year = __366__ days  
   c. 48 hours = __2__ days

2. Calculate the number of hours in:
   a. 120 minutes = __2__ hours    
   b. 2 days = __48__ hours
   c. 180 minutes = __3__ hours
   d. 1 week = __168__ hours

3. Write these minutes as hours and minutes:
   a. 120 minutes = __2__ hours __0__ minutes
   b. 150 minutes = __2__ hours __30__ minutes
   c. 200 minutes = __3__ hours __20__ minutes
   d. 85 minutes = __1__ hours __25__ minutes

4. Use what you know about time relationships to complete this cross number puzzle:
   **Across**
   1. Days in a leap year
   5. Weeks in a year
   7. Hours in 10 days
   8. Hours in __1/2__ day
   10. Minutes in __3/4__ hour
   12. Hours in 2 days
   13. Minutes in 1 hour

   **Down**
   2. Seconds in 1 minute
   3. Minutes in 1 hour and 40 minutes
   4. Minutes in __1/4__ hour
   6. Days in 3 weeks
   9. Days in a fortnight
   11. Minutes in __1/2__ hour
Measuring time – time trails

Elapsed time is how much time has passed between 2 different times. To work out the difference between 2 times, count the hours and then the minutes.

1:55 pm to 6:10 pm

1:55 to 5:55 = 4 hours
5:55 to 6:10 = 15 minutes

Total elapsed time is 4 hours and 15 minutes.

1 Practise counting on:

a in 5 minutes 2:45 2:50 2:55 3:00 3:05 3:10 3:15

b in 10 minutes 5:19 5:29 5:39 5:49 5:59 6:09 6:19

2 Show the new times on the clocks:

a 20 minutes later

b 1 hour and 20 minutes later

3 How much time has passed?

Elapsed time: 2 hours 25 minutes
We can use a timeline to help us with elapsed time problems.

**Problem:** Robbie got on the bus at 11:52 am and got off 30 minutes later. What time was it when Robbie got off the bus?

**Steps:**
1. Write the start time in the first box.
2. Use the timeline to count on in minutes.
   Each large marker is 10 minutes and each small marker is 2 minutes.

   **Answer:** 12:22 pm

**4 Use the timeline for each elapsed time problem:**

a  Rex went for a jog at the park. He headed out at 7:40 am and jogged for 45 minutes. What time did he finish jogging?

   **Answer:** 8:25 pm

b  Jamie watched a TV show that started at 4:56 pm and went for 54 minutes. What time did the TV show finish?

   **Answer:** 5:50 pm

c  Naomi baked a chocolate cake. She put it in the oven at 1:25 pm and set the timer for 55 minutes. What time did the timer buzz?

   **Answer:** 2:20 pm
Measuring time – calendars

30 days has September, April, June and November. All the rest have 31 days, except February alone which has 28 days clear and 29 days in each leap year.

1 Fill in the missing dates on this calendar:

<table>
<thead>
<tr>
<th>January 2010</th>
<th>February 2010</th>
<th>March 2010</th>
</tr>
</thead>
<tbody>
<tr>
<td>M T W T F S S</td>
<td>M T W T F S S</td>
<td>M T W T F S S</td>
</tr>
<tr>
<td>1 2 3</td>
<td>1 2 3 4 5 6 7</td>
<td>1 2 3 4 5 6 7</td>
</tr>
<tr>
<td>4 5 6 7 8 9 10</td>
<td>8 9 10 11 12 13 14</td>
<td>8 9 10 11 12 13 14</td>
</tr>
<tr>
<td>11 12 13 14 15 16 17</td>
<td>15 16 17 18 19 20 21</td>
<td>15 16 17 18 19 20 21</td>
</tr>
<tr>
<td>18 19 20 21 22 23 24</td>
<td>22 23 24 25 26 27 28</td>
<td>22 23 24 25 26 27 28</td>
</tr>
<tr>
<td>25 26 27 28 29 30 31</td>
<td>29 30 31</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>April 2010</th>
<th>May 2010</th>
<th>June 2010</th>
</tr>
</thead>
<tbody>
<tr>
<td>M T W T F S S</td>
<td>M T W T F S S</td>
<td>M T W T F S S</td>
</tr>
<tr>
<td>1 2 3 4</td>
<td>31</td>
<td>1 2</td>
</tr>
<tr>
<td>5 6 7 8 9 10 11</td>
<td>3 4 5 6 7 8 9</td>
<td>7 8 9 10 11 12 13</td>
</tr>
<tr>
<td>12 13 14 15 16 17 18</td>
<td>10 11 12 13 14 15 16</td>
<td>14 15 16 17 18 19 20</td>
</tr>
<tr>
<td>19 20 21 22 23 24 25</td>

Measuring time – timetables

Timetables are often used to schedule public transport.

1 Use the timetable to answer the questions below:

<table>
<thead>
<tr>
<th>Station</th>
<th>Time</th>
</tr>
</thead>
<tbody>
<tr>
<td>Burwood</td>
<td>5:20</td>
</tr>
<tr>
<td></td>
<td>5:27</td>
</tr>
<tr>
<td></td>
<td>5:50</td>
</tr>
<tr>
<td></td>
<td>7:17</td>
</tr>
<tr>
<td></td>
<td>8:26</td>
</tr>
<tr>
<td>Croydon</td>
<td>-</td>
</tr>
<tr>
<td></td>
<td>-</td>
</tr>
<tr>
<td></td>
<td>6:00</td>
</tr>
<tr>
<td></td>
<td>7:27</td>
</tr>
<tr>
<td></td>
<td>8:36</td>
</tr>
<tr>
<td>Ashfield</td>
<td>5:35</td>
</tr>
<tr>
<td></td>
<td>5:42</td>
</tr>
<tr>
<td></td>
<td>6:05</td>
</tr>
<tr>
<td></td>
<td>7:32</td>
</tr>
<tr>
<td></td>
<td>8:41</td>
</tr>
<tr>
<td>Summer Hill</td>
<td>-</td>
</tr>
<tr>
<td></td>
<td>6:12</td>
</tr>
<tr>
<td></td>
<td>7:39</td>
</tr>
<tr>
<td></td>
<td>8:48</td>
</tr>
<tr>
<td></td>
<td>8:53</td>
</tr>
<tr>
<td>Lewisham</td>
<td>5:48</td>
</tr>
<tr>
<td></td>
<td>5:55</td>
</tr>
<tr>
<td></td>
<td>6:18</td>
</tr>
<tr>
<td></td>
<td>7:45</td>
</tr>
<tr>
<td></td>
<td>8:54</td>
</tr>
</tbody>
</table>

a  What time does the 10 to 6 train from Burwood arrive at Ashfield?  __6:05__

b  I have just missed the 5:35 train from Ashfield. How long do I have to wait until the next train?  __7 mins__

c  I live in Croydon and I want to get to Lewisham by 6:30. Which train should I get?  __6:00__

2 Answer the questions below about this TV guide:

<table>
<thead>
<tr>
<th>Time</th>
<th>7:00–8:00 pm</th>
<th>8:00–9:00 pm</th>
<th>9:00–10:00 pm</th>
<th>10:00–11:00 pm</th>
</tr>
</thead>
<tbody>
<tr>
<td>Channel 1</td>
<td>News</td>
<td>Current Affairs</td>
<td>Soccer Finals</td>
<td>Late News</td>
</tr>
<tr>
<td>Channel 2</td>
<td>Days of Us</td>
<td>Fashion Watch</td>
<td>TV Bloopers</td>
<td>Movie Reviews</td>
</tr>
<tr>
<td>Channel 3</td>
<td>News</td>
<td>History of Gold</td>
<td>The Car Show</td>
<td>Late Night Movie</td>
</tr>
</tbody>
</table>

a  What time does Current Affairs on Channel 1 start?  __8:00 pm__

b  How long is the History of Gold on Channel 3?  __1 hour__

c  How long do the Soccer Finals go for?  __1 hour__

d  What time does TV Bloopers start?  __8:30 pm__

e  Alicia watches too much TV. If she watched Fashion Watch, TV Bloopers and then the movie Ghost Busters, how long was she in front of the box for?  __2 hours__
Five friends were all born in the same year. Read the clues to work out the month and day of the week that each person was born.

Names:  Max, Liam, Harriet, Stefan, Leonie
Days:  Monday, Tuesday, Thursday, Saturday, Sunday
Months:  March, June, July, November, December

**Clues:**

1. Max was born in March but not on a Tuesday.
2. His brother was born in November on a Thursday.
3. Liam was born on the weekend in the month after June.
4. One of the girls was born on Sunday in December.
5. Harriet was born one day after Max.
6. Stefan was born on the day of the week 2 days after Harriet in the month before December.
7. The child born on Monday was born in March.

<table>
<thead>
<tr>
<th>Name</th>
<th>Day of the week</th>
<th>Month</th>
</tr>
</thead>
<tbody>
<tr>
<td>Max</td>
<td>Monday</td>
<td>March</td>
</tr>
<tr>
<td>Stefan</td>

</tr>
</tbody>
</table>
This is a game for 3 players. You will need only 1 copy of this page. Cut out the set of cards below.

One player shuffles and deals 4 cards to each player. Players arrange their cards face up, in order from earliest to latest. The dealer starts by laying a card down and says, “I have … who has …?” All players try to be the first to lay the answer down. The first player to lay the matching card then reads their card and so on. Note: The person asking may have the matching card.

The first player to get rid of all their cards is the winner.
1 Draw the hour and minute hands on each clock to show the correct time:

a

Skills | Not yet | Kind of | Got it
---|---|---|---
• Reads time to 5 minute intervals | | | 
• Reads and writes digital time | | |
1. Draw the hour and minute hands on each clock to show the correct time:

   a. [Clock] 11:00 (half past 4)
   b. [Clock] 12:00 (6 o’clock)
   c. [Clock] 11:30 (half past 1)
   d. [Clock] 11:45 (half past 8)

2. Complete this row of clocks so that each clock and label shows the same time:

   a. [Clock] 10:10 (10 past 3)
   b. [Clock] 12:05 (5 to 6)
   c. [Clock] 10:40 (20 to 5)
   d. [Clock] 11:15 (15 past 10)

3. Write the times that these digital clocks are showing:

   a. [Clock] 01:53 (53 past 1)
   b. [Clock] 09:17 (17 past 9)
   c. [Clock] 06:55 (55 past 6)
   d. [Clock] 08:50 (50 past 8)

Measuring time

Name ___________________________

1. Complete this table by writing the times in digital form. Circle am or pm in the last column:

<table>
<thead>
<tr>
<th></th>
<th>Quarter to seven at night</th>
<th></th>
<th>am / pm</th>
</tr>
</thead>
<tbody>
<tr>
<td>a</td>
<td>_________________________</td>
<td></td>
<td></td>
</tr>
<tr>
<td>b</td>
<td>Twenty past four in the morning</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>_________________________</td>
<td></td>
<td></td>
</tr>
<tr>
<td>c</td>
<td>Twenty five to one in the day</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>_________________________</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

2. Add two hours to each of these digital times:

<table>
<thead>
<tr>
<th></th>
<th>7:53 am</th>
<th>4:18 pm</th>
<th>9:35 pm</th>
</tr>
</thead>
<tbody>
<tr>
<td>a</td>
<td>_________</td>
<td>_______</td>
<td>_______</td>
</tr>
<tr>
<td>b</td>
<td>_________</td>
<td>_______</td>
<td>_______</td>
</tr>
<tr>
<td>c</td>
<td>_________</td>
<td>_______</td>
<td>_______</td>
</tr>
</tbody>
</table>

3. Complete these time facts:

<table>
<thead>
<tr>
<th></th>
<th>3 weeks</th>
<th>180 minutes</th>
</tr>
</thead>
<tbody>
<tr>
<td>a</td>
<td>_________</td>
<td>_________</td>
</tr>
<tr>
<td>b</td>
<td>_________</td>
<td>_________</td>
</tr>
<tr>
<td>c</td>
<td>_________</td>
<td>_________</td>
</tr>
</tbody>
</table>

4. How much time has passed?

Elapsed time:

Start

Finish

## Series E – Time

<table>
<thead>
<tr>
<th>Region</th>
<th>Topic 1 Telling time</th>
<th>Topic 2 Measuring time</th>
</tr>
</thead>
</table>
| NSW    | **MS2.5** – Reads and records time in one-minute intervals and makes comparisons between time units  
  - recognise the coordinated movements of the hands on a clock  
  - associating the numerals 3, 6 and 9 with 15, 30 and 45 minutes and using the terms ‘quarter past’ and ‘quarter to’  
  - identifying which hour has just passed when the hour hand is not pointing to a numeral  
  - reading analogue and digital clocks to the minute e.g. 7:35 is read as ‘seven thirty-five’  
  - recording digital time using the correct notation e.g. 9:15  
  - relating analogue notation to digital notation e.g. ten to nine is the same as 8:50 | **MS2.5** – Reads and records time in one-minute intervals and makes comparisons between time units  
  - read and interpret simple timetables, timelines and calendars  
  - converting between units of time e.g. 60 seconds = 1 minute, 60 minutes = 1 hour, 24 hours = 1 day |
| VIC    | **Measurement VELS – Level 3**  
  - at Level 3, students estimate and measure time using appropriate instruments  
  - students read digital time displays and analogue clock times at five-minute intervals  
  - students interpret timetables and calendars in relation to familiar events | |
| QLD    | **M 3.2** – Students read, record and calculate with 12-hour time, and interpret calendars and simple timetables related to daily activities  
  - units – seconds (s), minutes (min), hours (h), half hour, quarter hour, years (yr)  
  - 12-hour displays - analogue (o’clock, half hour, 5-minute interval markings), digital (all times)  
  - calendars – abbreviations for days (e.g. Mon), months in words  
  - representations (e.g. 9:30, nine-thirty) | |
| SA     | **2.4** – Chooses, estimates and uses metric units to measure attributes of figures and objects; orders events or cycles of events; estimates the duration and time of events; constructs and uses measuring tools, explains that all measurement is approximate and that some tools increase precision  
  **2.5** – Uses direct measuring strategies to represent, communicate and record measurements graphically in symbols with correct units and performs simple operations on measures  
  - identifies appropriate strategies to address measurement problems | |
| WA     | **Level 3**  
  - the student selects appropriate attributes, distinguishes time from elapsed time, and chooses units of a sensible size for the descriptions and comparisons to be made. The student measures time by reading whole-number scales  
  - students understand and use 12-hour time | **Level 3**  
  - the student selects appropriate attributes, distinguishes time from elapsed time, and chooses units of a sensible size for the descriptions and comparisons to be made. The student measures time by reading whole-number scales  
  - the student understands elapsed time  
  - the student uses the known size of familiar things to help make and improve estimates  
  - students prepare and use timetables involving elapsed time |
