

Rounding Numbers

Round 69,538 to the nearest **hundred**.

rounding digit key digit

69,538

0 0

Answer = 69,500

Rounding digit remains unchanged.

Back ◀

Description

In this activity, students round the given number to the specified place value.

Teaching Hints

Use the visualization to walk students through the process of rounding. They should first determine the rounding digit and key digit. They should know that when the key digit is 4 or less they round down, and when it is five or more they round up.
