

# Divide Fractions by Fractions 1

Divide. Give your answer in simplest form.

$$\frac{7}{10} \div \frac{1}{4} = \frac{7}{10} \times \frac{4}{1}$$
$$= \frac{28}{10}$$
$$= 2 \frac{4}{5}$$

Simplify.

Back ◀

## Description

In this activity, students divide a fraction by a fraction. *This activity is non adaptive.*

## Teaching Hints

Use the visualization to show students that they should convert one of the fractions into its reciprocal and then multiply. Remind students to always check whether their answer can be simplified.

## Activities

Divide. Give your answer in simplest form.

$$\frac{8}{9} \div \frac{2}{5} = \frac{\square}{\square}$$
