Illinois Learning Standards (ILS) Mathematics

Grades K – High School

Mathletics Curriculum Alignment

Introduction

At Mathletics, we are committed to providing students, teachers and schools with high-quality learning resources that align with the most up-to-date curricula.

Our team of educational publishers has created a course that specifically follows the Illinois Learning Standards. You can be assured that students have access to relevant and targeted content.

Mathletics courses consist of topics based on domains, clusters and standards. The courses also include 'review' topics to provide additional learning support through targeted revision of topics from the previous grade level.

When a standard is best addressed by teacher directed activities, it is indicated in this document. Such activities may be explored using the Mathletics online eBooks, videos and interactives or through our engaging rich learning tasks.

This document outlines the curriculum alignment and acts as a useful guide when using Mathletics in your school.

Illinois Learning Standards (ILS): The ILS reproduced in this document have been developed by the Illinois Education Association in partnership with the National Governors Association and the Council of Chief State School Officers as well as the National Education Association, American Federation of Teachers, the International Reading Association, the National Council of Teachers of English, and the National Council of Teachers of Mathematics.

Kindergarten

Domain	Cluster	Standard	Standard Description	Activities
Counting & Cardinality	A: Know number names and the count sequence.	K.CC.A.1	Count to 100 by ones and tens.	Count to 5 Order Numbers to 10 Order Numbers to 20 Count by Tens Reading Numbers to 30 1 to 30 Before, After and Between to 20 Counting Up to 20
Counting & Cardinality	A: Know number names and the count sequence.	K.CC.A.2	Count forward beginning from a given number within the known sequence (instead of having to begin at 1).	Counting Forwards Going Up
Counting & Cardinality	A: Know number names and the count sequence.	K.CC.A.3	Write numbers from 0 to 20. Represent a number of objects with a written numeral 0–20 (with 0 representing a count of no objects).	Concept of zero Matching Numbers to 10 Matching Numbers to 20
Counting & Cardinality	B: Count to tell the number of objects.	K.CC.B.4	Understand the relationship between numbers and quantities; connect counting to cardinality. <ol style="list-style-type: none"> When counting objects, say the number names in the standard order, pairing each object with one and only one number name and each number name with one and only one object. Understand that the last number name said tells the number of objects counted. The number of objects is the same regardless of their arrangement or the order in which they were counted. Understand that each successive number name refers to a quantity that is one larger. 	How Many? How Many Dots?
Counting & Cardinality	B: Count to tell the number of objects.	K.CC.B.5	Count to answer “how many?” questions about as many as 20 objects arranged in a line, a rectangular array, or a circle, or as many as 10 things in a scattered configuration; given a number from 1–20, count out that many objects.	How Many? How Many Dots?
Counting & Cardinality	C: Compare numbers.	K.CC.C.6	Identify whether the number of objects in one group is greater than, less than, or equal to the number of objects in another group.	Picture Graphs: More or Less More, Less or the Same to 10 More, Less or the Same to 20
Counting & Cardinality	C: Compare numbers.	K.CC.C.7	Compare two numbers between 1 and 10 presented as written numerals.	Teacher directed

Kindergarten

Domain	Cluster	Standard	Standard Description	Activities
Operations & Algebraic Thinking	A: Understand addition as putting together and adding to, and understand subtraction as taking apart and taking from.	K.OAA.1	Represent addition and subtraction with objects, fingers, pennies, drawings, sounds, acting out situations, verbal explanations, expressions, equations or other strategies.	Teacher directed
Operations & Algebraic Thinking	A: Understand addition as putting together and adding to, and understand subtraction as taking apart and taking from.	K.OAA.2	Solve addition and subtraction word problems, and add and subtract within 10.	Adding to 5 Subtracting from 5 Adding to Ten All about Ten Subtracting from Ten Adding to make 5 and 10 Doubles and Halves to 10 Adding to 10 Word Problems
Operations & Algebraic Thinking	A: Understand addition as putting together and adding to, and understand subtraction as taking apart and taking from.	K.OAA.3	Decompose numbers less than or equal to 10 into pairs in more than one way and record each decomposition by a drawing or equation.	Adding to 5 Adding to make 5 and 10
Operations & Algebraic Thinking	A: Understand addition as putting together and adding to, and understand subtraction as taking apart and taking from.	K.OAA.4	For any number from 1 to 9, find the number that makes 10 when added to the given number. Record the answer with a drawing or equation.	Balance Numbers to 10 Adding to 5 Adding to make 5 and 10 Adding to Ten Subtracting from Ten
Operations & Algebraic Thinking	A: Understand addition as putting together and adding to, and understand subtraction as taking apart and taking from.	K.OAA.5	Fluently add and subtract within 5.	Adding to 5 Subtracting from 5
Number & Operations in Base Ten	A: Work with numbers 11–19 to gain foundations for place value.	K.NBT.A.1	Compose and decompose the numbers from 11 to 19 into ten ones and some further ones, and record each composition or decomposition by a drawing or equation; understand that these numbers are composed of the ones and one, two, three, four, five, six, seven, eight, or nine ones.	Making Teen Numbers Making Numbers Count
Measurement & Data	A: Describe and compare measurable attributes.	K.MD.A.1	Describe measurable attributes of objects, such as length or weight. Describe several measurable attributes of a single object.	Everyday Length Everyday Mass Balancing Act How Full?

Kindergarten

Domain	Cluster	Standard	Standard Description	Activities
Measurement & Data	A: Describe and compare measurable attributes.	K.MD.A.2	Directly compare two objects with a measurable attribute in common, to see which object has "more of"/"less of" the attribute, and describe the difference.	Compare Length Which Holds More?
Measurement & Data	B: Classify objects and count the number of objects in each category.	K.MD.B.3	Classify objects into given categories; count the numbers of objects in each category and sort the categories by count.	Sort It Same and Different
Geometry	A: Identify and describe shapes.	K.G.A.1	Describe objects in the environment using names of shapes, and describe the relative positions of these objects using terms such as <i>above</i> , <i>below</i> , <i>beside</i> , <i>in front of</i> , <i>behind</i> and <i>next to</i> .	Where is it? Left or Right?
Geometry	A: Identify and describe shapes.	K.G.A.2	Correctly name shapes regardless of their orientation or overall size.	Collect the Shapes Collect Simple Shapes Match the Solid 1
Geometry	A: Identify and describe shapes.	K.G.A.3	Identify shapes as two-dimensional (lying in a plane, "flat") or three-dimensional ("solid").	Teacher directed
Geometry	B: Analyze, compare, create and compose shapes.	K.G.B.4	Analyze and compare two- and three-dimensional shapes, in different sizes and orientations, using informal language to describe their similarities, differences, parts, and other attributes.	Count Sides and Corners How many Edges?
Geometry	B: Analyze, compare, create, and compose shapes.	K.G.B.5	Model shapes in the world by building shapes from components and drawing shapes.	Teacher directed
Geometry	B: Analyze, compare, create, and compose shapes.	K.G.B.6	Compose simple shapes to form larger shapes.	Teacher directed

Grade 1

Domain	Cluster	Standard	Outcome Description	 Activities
Operations & Algebraic Thinking	A: Represent and solve problems involving addition and subtraction.	1.OA.A.1	Use addition and subtraction within 20 to solve word problems involving situations of adding to, taking from, putting together, taking apart, and comparing, with unknowns in all positions.	Add and Subtract Using Graphs Add and Subtract Problems Adding to 10 Word Problems Problems: Add and Subtract
Operations & Algebraic Thinking	A: Represent and solve problems involving addition and subtraction.	1.OA.A.2	Solve word problems that call for addition of three whole numbers whose sum is less than or equal to 20.	Add Three 1-Digit Numbers Add 3 Numbers Using Bonds to 10
Operations & Algebraic Thinking	B: Understand and apply properties of operations and the relationship between addition and subtraction.	1.OA.B.3	Apply properties of operations as strategies to add and subtract.	Commutative Property of Addition Adding in Any Order Add 3 Numbers Using Bonds to 10
Operations & Algebraic Thinking	B: Understand and apply properties of operations and the relationship between addition and subtraction.	1.OA.B.4	Understand subtraction as an unknown-addend problem.	Related Facts 1
Operations & Algebraic Thinking	C: Add and subtract within 20.	1.OA.C.5	Relate counting to addition and subtraction.	Addition Facts
Operations & Algebraic Thinking	C: Add and subtract within 20.	1.OA.C.6	Add and subtract within 20, demonstrating fluency for addition and subtraction within 10. Use strategies such as: <ul style="list-style-type: none"> counting on; making ten; decomposing a number leading to a ten; using the relationship between addition and subtraction; and creating equivalent but easier or known sums. 	Fact Families: Add and Subtract Adding to Ten Subtracting from Ten Subtracting from 20 Composing Additions to 20 Add 3 Numbers using bonds to 10 Doubles and Near Doubles
Operations & Algebraic Thinking	D: Work with addition and subtraction equations.	1.OA.D.7	Understand the meaning of the equal sign, and determine if equations involving addition and subtraction are true or false.	Composing Numbers to 10 Balance Numbers to 20 Composing Additions to 20
Operations & Algebraic Thinking	D: Work with addition and subtraction equations.	1.OA.D.8	Determine the unknown whole number in an addition or subtraction equation relating three whole numbers.	Related Facts 1 Missing Numbers

Grade 1

Domain	Cluster	Standard	Outcome Description	Activities
Number & Operations in Base Ten	A: Extend the counting sequence.	1.NBT.A.1	Count to 120, starting at any number less than 120. In this range, read and write numerals and represent a number of objects with a written numeral.	Counting on a 100 grid Make Big Numbers Count Before, After & Between to 100 Count by 2s, 5s and 10s
Number & Operations in Base Ten	B: Understand place value.	1.NBT.B.2	Understand that the two digits of a two-digit number represent amounts of tens and ones. a. Understand 10 can be thought of as a bundle of ten ones, called a "ten". b. Understand that the numbers from 11 to 19 are composed of a ten and one, two, three, four, five, six, seven, eight, or nine ones. c. Understand that the numbers 10, 20, 30, 40, 50, 60, 70, 80, 90 refer to one, two, three, four, five, six, seven, eight or nine tens (and 0 ones).	Place Value 1 Making Teen Numbers Groups of Ten Complements to 10, 20, 50
Number & Operations in Base Ten	B: Understand place value.	1.NBT.B.3	Compare two two-digit numbers based on meanings of the tens and ones digits, recording the results of comparisons with the symbols $>$, $=$, and $<$.	Greater or Less to 100 Compare Numbers to 50 Compare Numbers to 100
Number & Operations in Base Ten	C: Use place value understanding and properties of operations to add and subtract.	1.NBT.C.4	Add within 100, including adding a two-digit number and a one-digit number, and adding a two-digit number and a multiple of 10, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method and explain the reasoning used. Understand that in adding two-digit numbers, one adds tens and tens, ones and ones, and sometimes it is necessary to compose a ten.	Complements to 10, 20, 50 Columns that Add Addictive Addition
Number & Operations in Base Ten	C: Use place value understanding and properties of operations to add and subtract.	1.NBT.C.5	Given a two-digit number, mentally find 10 more or 10 less than the number, without having to count; explain the reasoning used.	10 More, 10 Less 1 More, 10 Less

Grade 1

Domain	Cluster	Standard	Outcome Description	 Activities
Number & Operations in Base Ten	C: Use place value understanding and properties of operations to add and subtract.	1.NBT.C.6	Subtract multiples of 10 in the range 10–90 from multiples of 10 in the range 10–90 (positive or zero difference) using: concrete models or drawings, and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy used to a written method and explain the reasoning used.	Subtract Tens
Measurement & Data	A: Measure lengths indirectly and by iterating length units.	1.MD.A.1	Order three objects by length; compare the lengths of two objects indirectly by using a third object.	Compare Length 1 Comparing Length Everyday Length
Measurement & Data	A: Measure lengths indirectly and by iterating length units.	1.MD.A.2	Measure the length of an object as a whole number of length units, by laying multiple copies of a shorter object (the length unit) end to end.; understand that the length measurement of an object is the number of same-size length units that span it with no gaps or overlaps.	Measuring length with blocks
Measurement & Data	B: Tell and write time.	1.MD.B.3	Tell and write time in hours and half-hours using analog and digital clocks.	Hour Times Half Hour Times Tell Time to the Half Hour
Measurement & Data	C: Represent and interpret data.	1.MD.C.4	Organize, represent, and interpret data with up to three categories; ask and answer questions about the total number of data points, how many in each category, and how many more or less are in one category than in another.	Who has the Goods? Pictographs Sorting Data 1
Geometry	A: Reason with shapes and their attributes.	1.G.A.1	Distinguish between defining attributes versus non-defining attributes; build and draw shapes to possess defining attributes.	Teacher directed
Geometry	A: Reason with shapes and their attributes.	1.G.A.2	Compose two-dimensional shapes (rectangles, squares, trapezoids, triangles, half-circles, and quarter-circles) or three-dimensional shapes (cubes, right rectangular prisms, right circular cones, and right circular cylinders) to create a composite shape, and compose new shapes from the composite shape.	Collect Simple Shapes Collect the Objects 2 Match the Solid 2

Grade 1

Domain	Cluster	Standard	Outcome Description	 Activities
Geometry	A: Reason with shapes and their attributes.	1.G.A.3	Partition circles and rectangles into two and four equal shares, describe the shares using the words <i>halves</i> , <i>fourths</i> , and <i>quarters</i> , and use the phrases <i>half of</i> , <i>fourth of</i> , and <i>quarter of</i> . Describe the whole as two of, or four of the shares. Understand for these examples that decomposing into more equal shares creates smaller shares.	Halves Halves and Quarters

Grade 2

Domain	Cluster	Standard	Standard Description	Activities
Operations & Algebraic Thinking	A: Represent and solve problems involving addition and subtraction.	2.OA.A.1	Use addition and subtraction within 100 to solve one- and two-step word problems involving situations of adding to, taking from, putting together, taking apart, and comparing, with unknowns in all positions.	Bar model problems 1
Operations & Algebraic Thinking	B: Add and subtract within 20.	2.OA.B.2	Fluently add and subtract within 20 using mental strategies. Strategies could include: making ten; decomposing a number leading to a ten; using the relationship between addition and subtraction; creating equivalent but easier or known sums; and counting on. By the end of Grade 2, know from memory all sums of two one-digit numbers.	Add to 18 Addition Facts to 18 Subtraction Facts to 18 Simple Subtraction Additive Addition Fact Families: Add and Subtract
Operations & Algebraic Thinking	C: Work with equal groups of objects to gain foundations for multiplication.	2.OA.C.3	Determine whether a group of objects (up to 20) has an odd or even number of members; write an equation to express an even number as a sum of two equal addends.	Odd or Even Count by Twos Counting by Twos
Operations & Algebraic Thinking	C: Work with equal groups of objects to gain foundations for multiplication.	2.OA.C.4	Use addition to find the total number of objects arranged in rectangular arrays with up to 5 rows and up to 5 columns; write an equation to express the total as a sum of equal addends.	Groups of Two Groups of Three Groups of Four Groups of Five
Number & Operations in Base Ten	A: Understand place value.	2.NBT.A.1	Understand that the three digits of a three-digit number represent amounts of hundreds, tens, and ones. Understand the following as special cases: a. 100 can be thought of as a bundle of ten tens – called “hundred”. b. The numbers 100, 200, 300, 400, 500, 600, 700, 800, 900 refer to one, two, three, four, five, six, seven, eight, or nine hundreds (and 0 tens and 0 ones).	Place Value Partitioning Model Numbers Understanding Place Value 1 Place value 1 Place value 2 Repartition Two-digit Numbers
Number & Operations in Base Ten	A: Understand place value.	2.NBT.A.2	Count within 1000; skip-count by 5s, 10s, and 100s.	Skip Counting with coins Counting by Fives Counting by Tens Count by 2s, 5s and 10s Counting on a 100 grid
Number & Operations in Base Ten	A: Understand place value.	2.NBT.A.3	Read and write numbers to 1000 using base-ten numerals, number names, and expanded form.	Model Numbers Repartition Two-digit Numbers Place value 1 Place value 2 Understanding Place Value 1

Grade 2

Domain	Cluster	Standard	Standard Description	 Activities
Number & Operations in Base Ten	A: Understand place value.	2.NBT.A.4	Compare two three-digit numbers based on meanings of the hundreds, tens, and ones digits, using $>$, $=$, and $<$ symbols to record the results of comparisons.	Which is Bigger? Which is Smaller?
Number & Operations in Base Ten	B: Use place value understanding and properties of operations to add and subtract.	2.NBT.B.5	Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction.	Complements to 10, 20, 50 Adding to 2-digit numbers Subtract Tens Complements to 50 and 100 Strategies for Column Addition Decompose Numbers to Subtract Add and Subtract Using Graphs
Number & Operations in Base Ten	B: Use place value understanding and properties of operations to add and subtract.	2.NBT.B.6	Add up to four two-digit numbers using strategies based on place value and properties of operations.	Add 3 Numbers: Bonds to 100 Add 3 Numbers: Bonds to Multiples of 10 Columns that Add Columns that Subtract
Number & Operations in Base Ten	B: Use place value understanding and properties of operations to add and subtract.	2.NBT.B.7	Add and subtract within 1000, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method. Understand that in adding or subtracting three-digit numbers, one adds or subtracts hundreds and hundreds, tens and tens, ones and ones; and sometimes it is necessary to compose or decompose tens or hundreds.	Add Two 2-Digit Numbers Add Two 2-Digit Numbers: Regroup Add Three 2-Digit Numbers Add Three 2-Digit Numbers: Regroup Add 3-Digit Numbers Add 3-Digit Numbers: Regroup 2-Digit Differences 2-Digit Differences: Regroup 3-Digit Differences 3-Digit Differences with Zeros 3-Digit Differences: 1 Regrouping 3-Digit Differences: 2 Regroupings
Number & Operations in Base Ten	B: Use place value understanding and properties of operations to add and subtract.	2.NBT.B.8	Mentally add 10 or 100 to a given number 100–900, and mentally subtract 10 or 100 from a given number 100–900.	Magic Mental Addition Mental Subtraction
Number & Operations in Base Ten	B: Use place value understanding and properties of operations to add and subtract.	2.NBT.B.9	Explain why addition and subtraction strategies work, using place value and the properties of operations.	Teacher directed
Measurement & Data	A: Measure and estimate lengths in standard units.	2.MD.A.1	Measure the length of an object by selecting and using appropriate tools such as rulers, yardsticks, meter sticks, and measuring tapes.	Measuring Length How Long Is That (Customary)? Measure to the Nearest Half Inch
Measurement & Data	A: Measure and estimate lengths in standard units.	2.MD.A.2	Measure the length of an object twice, using different lengths for the two measurements; describe how the two measurements relate to the size of the unit chosen.	Teacher directed

Grade 2

Domain	Cluster	Standard	Standard Description	 Activities
Measurement & Data	A: Measure and estimate lengths in standard units.	2.MD.A.3	Estimate lengths using units of inches, feet, centimeters, and meters.	Inches, Feet, Yards
Measurement & Data	A: Measure and estimate lengths in standard units.	2.MD.A.4	Measure to determine how much longer one object is than another, expressing the length difference in terms of a standard length unit.	Teacher directed
Measurement & Data	B: Relate addition and subtraction to length.	2.MD.B.5	Use addition and subtraction within 100 to solve word problems involving lengths that are given in the same units.	Teacher directed
Measurement & Data	B: Relate addition and subtraction to length.	2.MD.B.6	Represent whole numbers as lengths from 0 on a number line diagram with equally spaced points corresponding to the numbers 0, 1, 2, ..., and represent whole-number sums and differences within 100 on a number line diagram.	Number Lines
Measurement & Data	C: Work with time and money.	2.MD.C.7	Tell and write time from analog and digital clocks to the nearest five minutes, using a.m and p.m.	Five Minute Times Quarter to and Quarter past
Measurement & Data	C: Work with time and money.	2.MD.C.8	Solve word problems involving dollar bills, quarters, dimes, nickels, and pennies, using \$ and ¢ symbols appropriately.	Using Fewest Coins to Make an Amount Who's got the Money?
Measurement & Data	D: Represent and interpret data.	2.MD.D.9	Generate measurement data by measuring lengths of several objects to the nearest whole unit, or by making repeated measurements of the same object. Show the measurements by making a line plot, where the horizontal scale is marked off in whole-number units.	Teacher directed
Measurement & Data	D: Represent and interpret data.	2.MD.D.10	Draw a picture graph and a bar graph (with single-unit scale) to represent a data set with up to four categories. Solve simple put-together, take-apart, and compare problems using information presented in a bar graph.	Making Graphs Bar Graphs 1 Picture Graphs: single-unit scale
Geometry	A: Reason with shapes and their attributes.	2.G.A.1	Recognize and draw shapes having specified attributes, such as a given number of angles or a given number of equal faces. Identify triangles, quadrilaterals, pentagons, hexagons, and cubes.	Collect the Polygons How many Faces? How many Edges? How many Corners? Count Sides and Corners
Geometry	A: Reason with shapes and their attributes.	2.G.A.2	Partition a rectangle into rows and columns of same-size squares and count to find the total number of them.	Teacher directed

Grade 2

Domain	Cluster	Standard	Standard Description	 Activities
Geometry	A: Reason with shapes and their attributes.	2.G.A.3	Partition circles and rectangles into two, three, or four equal shares, describe the shares using the words halves, thirds, half of, a third of, etc and describe the whole as two halves, three thirds, four fourths. Recognize that equal shares of identical wholes need not have the same shape.	Shape Fractions Halves and Quarters

Grade 3

Domain	Cluster	Standard	Standard Description	 Activities
Operations & Algebraic Thinking	A: Represent and solve problems involving multiplication and division.	3.OAA.1	Interpret products of whole numbers.	<ul style="list-style-type: none"> Groups of Two Groups of Three Groups of Four Groups of Five Groups of Six Groups of Seven Groups of Eight Groups of Nine Groups of Ten Times Tables Multiplication Arrays Multiplication Arrays Frog Jump Multiplication Multiplication Arrays Model Multiplication to 5 x 5

Multiply Multiples of 10 Multiply More Multiples of 10 Equivalent Facts: Multiply Multiplication Grids Short Multiplication Multiply: 1-Digit Number Multiply: 1-Digit Number, Regroup Multiply: 2-Digit by 1-Digit

Grade 3

Domain	Cluster	Standard	Standard Description	Activities
Number & Operations – Fractions	A: Develop understanding of fractions as numbers.	3.NF.A.1	Understand a fraction $\frac{1}{b}$ as the quantity formed by 1 part when a whole is partitioned into b equal parts. Understand a fraction $\frac{a}{b}$ is the quantity formed by a parts of size $\frac{1}{b}$.	Fractions Model Fractions What Fraction Is Shaded? Halves and Quarters Thirds and Sixths
Number & Operations – Fractions	A: Develop understanding of fractions as numbers.	3.NF.A.2	Understand a fraction as a number on the number line; represent fractions on a number line diagram. a. Represent a fraction $\frac{1}{b}$ on a number line by defining the interval from 0 to 1 as the whole and partitioning it into b equal parts. Recognize that each part has size $\frac{1}{b}$ and that the endpoint of the part based at 0 locates the number $\frac{1}{b}$ on the number line. b. Represent a fraction $\frac{a}{b}$ on a number line diagram by marking off a lengths $\frac{1}{b}$ from 0. Recognize that the resulting interval has size $\frac{a}{b}$ and that its endpoint locates the number $\frac{a}{b}$ on the number line.	Counting with Fractions on a Number Line
Number & Operations – Fractions	A: Develop understanding of fractions as numbers.	3.NF.A.3	Explain equivalence of fractions in special cases, and compare fractions by reasoning about their size. a. Understand two fractions as equivalent (equal) if they are the same size, or the same point on a number line. b. Recognize and generate simple equivalent fractions. Explain why the fractions are equivalent. c. Express whole numbers as fractions, and recognize fractions that are equivalent to whole numbers. d. Compare two fractions with the same numerator or the same denominator by reasoning about their size. Recognize that comparisons are valid only when the two fractions refer to the same whole. Record the results of comparisons with the symbols $>$, $=$, or $<$, and justify the conclusions.	Comparing Fractions 1 Part-whole rods 1 Part-whole rods 2 Uneven partitioned shapes 1
Measurement & Data	A: Solve problems involving measurement and estimation.	3.MD.A.1	Tell and write time to the nearest minute and measure time intervals in minutes. Solve word problems involving addition and subtraction of time intervals in minutes.	What is the Time? Five Minute Times Time Mentals Elapsed Times

Grade 3

Domain	Cluster	Standard	Standard Description	 Activities
Measurement & Data	A: Solve problems involving measurement and estimation.	3.MD.A.2	Measure and estimate liquid volumes and masses of objects using standard units of grams (g), kilograms (kg), and liters (l). Add, subtract, multiply, or divide to solve one-step word problems involving masses or volumes that are given in the same units.	Mass Word Problems Cups, Pints, Quarts, Gallons
Measurement & Data	B: Represent and interpret data.	3.MD.B.3	Draw a scaled picture graph and a scaled bar graph to represent a data set with several categories. Solve one- and two-step "how many more" and "how many less" problems using information presented in scaled bar graphs.	Making Graphs Pictographs Bar Graphs 1 Bar Graphs 2 Add and Subtract Using Graphs Picture Graphs: with scale & half symbols
Measurement & Data	B: Represent and interpret data.	3.MD.B.4	Generate measurement data by measuring lengths using rulers marked with halves and fourths of an inch. Show the data by making a line plot, where the horizontal scale is marked off in appropriate units – whole numbers, halves, or quarters.	Teacher directed
Measurement & Data	C: Geometric measurement: understand concepts of area and relate area to multiplication and to addition.	3.MD.C.5	Recognize area as an attribute of plane figures and understand concepts of area measurement. a. A square with side length 1 unit, called "a unit square", is said to have "one square unit" of area, and can be used to measure area. b. A plane figure which can be covered without gaps or overlaps by n unit squares is said to have an area of n square units.	Equal Areas Biggest Shape
Measurement & Data	C: Geometric measurement: understand concepts of area and relate area to multiplication and to addition.	3.MD.C.6	Measure areas by counting unit squares (square cm, square m, square in, square ft, and improvised units).	Area of Shapes Area of Shapes (inches, feet, yards)
